Are you making cretonne doilies? If not, then you are not in the fashion at all, as they are quite the rage at present. One department store sells cretonne just for that purpose and it is possible to cut it so that a bunch of dainty flowers will be in the center of each doily. The edge is then crocheted with mercerized thread in a very simple pattern and almost before you know it you have a set of pretty breakfast doilies.

It seems that as long as the present Mayor and Council continue to raise chickens and permit them to feed on and tear up other peoples' property, the ladies of the Civic Improvement Society will receive little success with their petition to have an ordinance passed that will oblige the chicken raisers to keep the disturbing element at home. What's the use of having a "city beautiful," if everyone cannot work in harmony to make it so? The Civic Improvement Association is surely doing its part to help the city, and while the city itself has responded in many ways it must be admitted, still, it is a most discouraging fact to see one's efforts continually being torn up, and all because, since the thoughtless ones will show no consideration for their neighbors of their own free will—these officials will not see that they are forced to keep the "scratchers" within their own limits.

Mr. Mayor, and Councilmen, put yourself in the place of your neighbor, who is paying for a lack of brotherly love and consideration, wouldn't you be up in arms? would you do everything within reason to have the continued offence stopped? I wager to say you would indeed. Why not then at your next meeting get together, and use your influence to better these conditions?

COWPEAS.

By C. M. McWilliams.

Because of the shortage of clover this year, a greater acreage of cowpeas will be put out than usual. The cowpea is well suited to take the place of clover and because of its nitrogen gathering power improves soil and makes hay that is rich in protein. In fact, it ranks with clover and alfalfa. The cowpeas is a southern plant, is very sensitive to frost, and will not thrive in a cold wet soil. Cowpeas should not be planted until the soil is thoroughly warm. This is rarely before May 15th; usually June 1st to 15th is the most satisfactory time for seeding. Cowpeas will grow on land where alfalfa will not grow at all and where clover does not thrive. Acid soils are not favorable to its growth but cowpeas will often make a fair crop on thin land that shows a decidedly acid reaction.

That the cowpeas is a soil builder is unquestioned, and because of its nitrogen gathering bacteria leaves the soil loose and friable. On rolling lands where the crops have been taken off and nothing returned, loss from washing has sometimes occurred. This may be averted either by pasturing off the crop, or by giving the soil a dressing of manure, or even straw, in fact, anything to hold it. Where cowpeas are grown continually on rolling land and everything taken off and nothing returned, washing is the inevitable results. The result would be the same with any cultivated crop if the soil was not properly taken care of.

Varieties.

For this section the New Era (Blue) pea, and the Whippoorwill are the most popular and best known; often the mixture of the two is used. The New Era is an early variety that matures in from 75 to 100 days. It is more erect and vines less than the Whippoorwill, which mature somewhat later. There are a number of other varieties, but they are not generally grown here.

Cowpeas make excellent hay—hay that will take the place of clover, pound for pound, and this will no doubt be the principal reason for seeding this year. Cowpeas may be profitably grown in mixtures. Cow-

peas in corn are very satisfactory. They may either be dropped in the hill at planting time or broadcasted before the last cultivation. Both methods have given good satisfaction, but the former is usually preferable. Corn and cowpeas make an ideal hog pasture because the constitute a balanced ration. Lambs also do well on such forage and do not molest the ears of corn. This mixture is also satisfactory for ensilage and is often used for that purpose.

Cowpeas and Sorghum.

In some sections of the south this mixture is popular. The two kinds of seed should be well mixed and sowed on well prepared land with a grain drill. One bushel of peas and half bushel of sorghum seed are usually sown on one acre. Amber is the variety of sorghum generally used.

Seeding.

When cowpeas are drilled alone 5 pecks of seed is the amount usually put on one acre; if drilled in rows 24-36 inches apart and cultivated half bushel to 3 pecks is sufficient. Larger yields of hay have been obtained by cultivating but the increased cost has made a difference in favor of thicker seeding and no cultivation. Cowpeas, will do better if sowed in a well prepared seed bed after all danger of frost is passed.

The man who has no clover this year cannot do better than to plant a few acres of peas.

WILL "CAN" HISTORY OF WAR

Modern Historic Records Association Will Bottle Up All That Happens in Mexico.

(WNU News Service.) New York, April 27.—At a meeting of the Modern Historical Records association, of which Herbert L. Bridge-man of the Brooklyn Eagle is president, it was announced that it was decided to send an expedition to Vera Cruz to follow the developments of the Mexican troubles, recording the events as they occur by phonographs and moving pictures.

The records thus obtained will be sealed and deposited in the archives of the institution, temporarily located in New York public library, to be opened after a period of years. It is expected that all the principal engagements during the progress of hostilities "will be canned" for the benefit of posterity," the announcement states.

MEXICAN ARMIES COMBINE

REBELS AND FEDERALS GET TOGETHER, IS RUMOR.

Military Bodies Operating in State of Coahuila Make Common Cause Against Americans.

(WNU News Service.) San Antonio, Tex., April 28.—That federals and rebels in Coahuila state are combining against the Americans is the news brought here by C. A. Robson of the Coahuila Coal company of New York at Palan, Mex. Robson, who was the last American in that section of Coahuila, declares that Gen. Juardo, federal, and Gen. Mongela, rebel, met at Baratarian. A battle was imminent when Juardo sent a white flag and said the Americans were going to intervene. A brief fight took place and then the forces joined, making a total of about 3,000.

Robson, with 12 American ranchers, left Baratarian, on the Mexican National train, which carried them 75 miles. They then left the train and came by automobile to Ciudad Porfirio Diaz, crossed to Eagle Pass, thence to San Antonio. Robson left Palan when 900 employees of the company threatened him. He declared that the railway from Ciudad Porfirio Diaz to Monclova is open, except for one burned bridge, but nine bridges are burned on the line from Monclova to Saltillo.

Man, 79, to Take Fifth Wife, 73. Wabash, Ind., March 12.—A marriage license has been issued to Philo Willets, aged 79, of Andrews, and Mary Elizabeth Fredericks, a widow, aged 73, of North Manchester.

READING ROAD HEAD DEAD

George F. Baer Dies at His Home in Philadelphia, Following Collapse in Street.

(WNU News Service.) Philadelphia, April 28.—George F. Baer, president of the Philadelphia & Reading railway and active in the organization and management of many coal, iron and transportation companies, died at his home in Philadelphia after being stricken on the street while walking to his office.

Gastric trouble, supplemented by a kidney disorder, is believed by the physicians to have been responsible for Mr. Baer's sudden illness.

Converts Cost \$150. Scranton, Pa., April 28.—Billy Sunday's converts here cost about \$150 each, according to the reports of the finance and religious committees. Approximately \$27,500 was raised for the evangelistic party aside from the providing of the hall. The converts number 18,521 at last count.

Several of the local lodges contributed to the evangelistic fund, the Masons sending a check for \$850. The public utility corporations declined to contribute, although local ministers brought considerable pressure to bear on them. After a week's rest at Winoona Lake, Sunday's home, the Sunday party will go to Huntington, W. Va.

SAYS RATES ARE TOO LOW

FEDERAL OWNERSHIP IN SIGHT IF NO INCREASE IS GRANTED.

Railroad Attorney Declares Charges Now Allowed Are Insufficient to Run Business.

(WNU News Service.) Washington, June 28.—That government ownership of railroads would be a necessary sequence to a refusal of the interstate commerce commission to permit an advance in freight rates—or at least to provide for additional net revenue to the roads—was the suggestion made in briefs and arguments submitted to the commission in the eastern rate case.

When the arguments opened it was suggested by counsel that the proceedings might require several days. Chairman Harlan, however, said that the commission would make no definite allotment of time at present, but later would announce its views as to the time to be consumed in argument.

George Stuart Patterson, general counsel of the Pennsylvania, opened the argument for the railroads.

Voluntarily briefs filed on behalf of the 35 eastern railway systems set forth that the purchasing power of money has so decreased in the last 18 years that money now paid for freight charges is worth 30 per cent less in the market for commodities than in 1896.

The brief submitted by the general counsel of the carriers says:

"The railroads are still required to sell their services at rates even less than those established years ago after competition had forced them to a low level and to take their pay in a depreciated currency, buy their materials, borrow their capital and pay their taxes on the basis of present-day commodity prices."
